State:

Missouri

American taxpayers are quite interested in knowing how banks have used the money that Treasury has invested under the Capital Purchase Program (CPP). To answer that question, Treasury is seeking responses that describe generally how the CPP investment has affected the operation of your business. We understand that once received, the cash associated with TARP funding is indistinguishable from other cash sources, unless the funds were segregated, and therefore it may not be feasible to identify precisely how the CPP investment was deployed or how many CPP dollars were allocated to each use. Nevertheless, we ask you to provide as much information as you can about how you have used the capital Treasury has provided, and how your uses of that capital have changed over time. Treasury will be pairing this survey with a summary of certain balance sheet and other financial data from your institution's regulatory filings, so to the extent you find it helpful to do so, please feel free to refer to your institution's quarterly call reports to illustrate your answers. This is your opportunity to speak to the taxpayers in your own words, which will be posted on our website.

What specific ways did your institution utilize CPP capital? Check all that apply and elaborate as appropriate, especially if the uses have shifted over time. Your responses should reflect actions taken over the past year (or for the portion of the year in which CPP funds were outstanding).

	see response below.
than otherwise would have occurred.	

¹If repayment was incremental, please enter the most recent repayment date.

To the extent the funds supported increased lending, please describe the major type of loans, if possible (residential mortgage loans, commercial mortgage loans, small business loans, etc.).	see response below
Increase securities purchased (ABS, MBS,	
etc.).	
Make other investments	
Increase reserves for non-performing assets	

X	Reduce borrowings	The holding company repaid \$7.65 million of senior debt of the company, \$5 million of which had
		previously been invested in the subsidiary bank as additional paid in capital.
	Increase charge-offs	
	Purchase another financial institution or	
	purchase assets from another financial	
	institution	
X	Held as non-leveraged increase to total	See response below.
	capital	

The holding company was able further strengthen its subsidiary bank's regulatory capital levels above the minimum levels to be conscapitalized" at a time when banking regulators were generally requiring banks to hold higher capital levels. As a result, the bank was curtailment of its lending activities because of capital constraints.	idered "well able to avoid

What actions were you able to take that you may not have taken without the capital infusion of CPP funds?	
The CPP capital was initially used to increase the regulatory capital levels at the subsidiary bank. For example, the bank's total risk-based ratio as of the quarter end immediately preceding the receipt of the funds (December 31, 2008) was 10.26%. On a pro forma basis after geffect to receipt of the funds, the bank's December 31, 2008 total risk-based capital ratio would have been 12.02%. This allowed the bank maintain a safe margin of capital above the minimum levels to be considered "well capitalized" and to continue lending to its commercial residential customers. Total mortgage and nonmortgage loans increased approximately 5% to \$1.282 million at December 31, 2009 from million at December 31, 2008. Loan originations for the year ended December 31, 2009 totaled \$3.26 billion compared with \$2.02 billion Loan originations for 2009 included \$2.73 billion in single family mortgage loans (including \$2.53 billion in loans originated for sale in the secondary market), \$529.6 million in commercial real estate and commercial nonmortgage loans and \$2.2 million in consumer loans.	living k to Il and n \$1.225 in 2008.

Please describe any other actions that you were able to undertake with the capital infusion of CPP funds.		
he CPP capital was initially used to increase the regulatory capital levels at the subsidiary bank. As a result of its stronger capital position and more flexibility to proactively work with its borrowers who were experiencing financial difficulties in the current economic climate nodifying their loan repayment terms (referred to as "troubled debt restructurings") with the belief that these actions would allow most remain in their homes while maximizing the bank's recoveries on these loans. Troubled debt restructurings increased approximate 22.5 million at December 31, 2008 to \$31.0 million at December 31, 2009.	e by ore borrowers	

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 1505-0222. The time required to complete this information collection is estimated to average 80 hours per response.
